

Mad Skulz Art Contest Winners

Hey Mad Skulz fam! We have selected the winners of our first Mad Skulz contest! Contratulations!

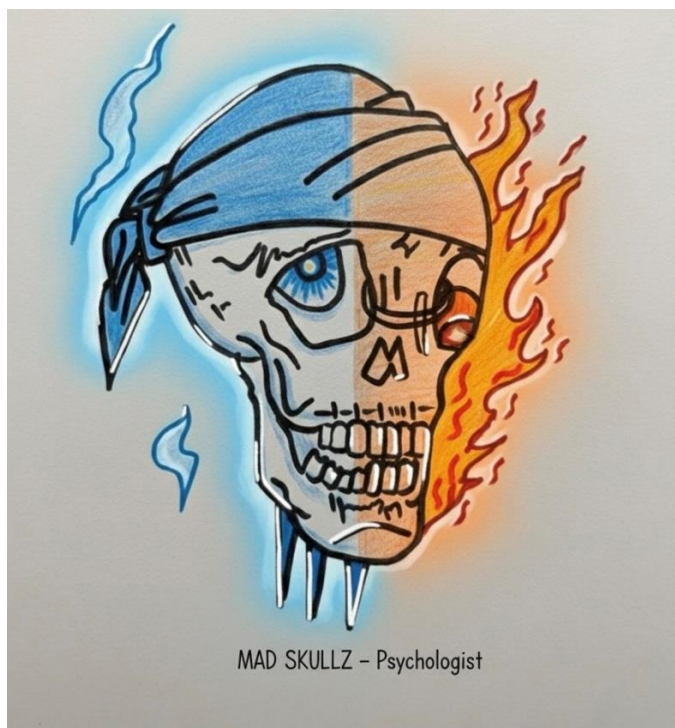

We were thrilled to see all the entries come in! It was an extremely hard task to select the winners in this contest! The amount of creativity, skills, abilities, and vision that was displayed in the entries was incredible! However, we had to base our decisions on what the rules were.

We had asked entrants to use any Mad Skulz NFT they minted, or an image of a Mad Skulz character and create unique artwork inspired by it! We asked for the art to not be an AI or app generated image. We asked that the art showcase Mad Skulz in a good light.

Here are the winners, starting with 1st, 2nd, and then 3rd place.

1st place: Psychologist

Winner of 3 Mad Skulz NFTs + 10,000 [\\$MADSKULZ](#) Tokens

We loved to see how this Mad Skulz character was transformed, and used as inspiration in her art piece. We love that it was hand drawn, and that she envisioned a “Fire and Ice” theme within the art piece! This piece shows high creativity while at the same showcasing the wonderful Mad Skulz feeling!

2nd place: t0_Obiii

Winner of 2 Mad Skulz NFTs + 1000 [\\$MADSKULZ](#) Tokens

We loved how his Mad Skulz NFT was incorporated into this art piece. He was able to take inspiration from the Mad Skulz and extend it into this scene which tells a story! We love the ambiance created by placing the subject into this smoking room, fireplace scene!

3rd place – Narrrf

Winner of 1 Mad Skulz NFT + 100 [\\$MADSKULZ](#) Tokens

Although AI was used to create this piece, we had to make a bit of an exception! We loved how the Mad Skulz concept was fused along with the Narrrf World mouse concept into a very interesting piece. This shows a lot of creativity, and a lot of work, even though AI was used to generate it. It would have had to take a lot of work, many passes and tweaking AI, to generate this piece.
